

MS Analyzed Vial Kits

The only family of vials
tested to provide a
clear advantage

Prevent unknown peaks impacting your results

The first vials and closures with true lot-specific and traceable LC/MS & GC/MS testing results in a single package.

Now you can choose the vials that best suit your needs and enjoy the confidence of knowing your results will be accurate – without pre-testing.

Our new portfolio of MS Analyzed Vial Kits are the first family of vials and closures that present both LC/MS and GC/MS tested lot-specific traces on a Certificate of Analysis that is included with each kit.

Having these lot-specific results at your fingertips means you'll never have to spend valuable time or incur additional expense pre-testing vials or rerunning samples due to unexpected peaks. It provides the assurance that one of the smallest parts of your sequence won't be one of your largest risks of failure.

Save time and increase productivity with the first family of vials and closures to certify true LC/MS & GC/MS lot-specific testing results in a single package.

All MS Analyzed Vial Kits are:

- Shipped with lot-specific Certificate of Analysis including MS traces
- Lot tested by both GC/MS and LC/MS
- Manufactured for full-warranted compatibility with Agilent autosamplers
- Packed in a clean environment using clean packaging

Agilent's new MS Analyzed Vial Kits deliver certified lot-specific mass spec trace analysis for greater confidence in results

Our new MS Analyzed Vial Kits come in the configurations you need. They are available with screw-top and crimp-top closures and have larger write-on spots for easier labeling and identification.

MS Analyzed Vial Kits	Unit	Part No.
Clear screw top vials, blue screw caps, PTFE/silicone septa	100/pk	5190-2277
Clear screw top vials with write-on spot, blue screw caps, PTFE/silicone septa	100/pk	5190-2278
Amber screw top vials, blue screw caps, PTFE/silicone septa	100/pk	5190-2279
Amber screw top vials with write-on spot, blue screw caps, PTFE/silicone septa	100/pk	5190-2280
Clear crimp top vials, silver-tone aluminum crimp caps, PTFE/silicone septa	100/pk	5190-2281
Clear crimp top vials with write-on spot, silver-tone aluminum crimp caps, PTFE/silicone septa	100/pk	5190-2282
Amber crimp top vials with write-on spot, silver-tone aluminum crimp caps, PTFE/silicone septa	100/pk	5190-2283
