

REFLECT™ IMMOBILIZED Polysaccharide Chiral Columns

High Performance Chiral Columns at an Affordable Price

REFLECT™ immobilized chiral columns are rugged polysaccharide phases suitable for a wide range of chiral compounds. Unique, proprietary, phase coverage provides excellent peak shape and improved resolution versus leading chiral phases. High resolution greatly improves preparative loading, leading to greater productivity and higher purity separations. Combined with attractive pricing and rapid delivery, REFLECT™ chiral columns deliver the performance and productivity you expect.

- **NEW!** REFLECT™ I-Cellulose Z phase now available!
- Rugged, immobilized phase for long column lifetimes
- High efficiency media with excellent peak shape and loading capacity
- Compatible with a broad range of solvents and separation modes (NP, RP, Polar Organic, SFC)
- Fully scalable from 3- to 20 μm
- Fast delivery—all sizes, anywhere in the world

The REFLECT™ Column Guarantee
